Setting Up RSS Feeds for Specific Journals

- Go to the libraries’ homepage
- Mouse over the tab Research Tools
- Click on Articles & Databases in the drop-down menu
- Click on View Databases by Name or Subject
- Select a database provided by EBSCO
- Click on the database name
- When the database page opens, click on Publications at the top of the page
- Type in the name of the publication that you are looking for in the search box
- Click on Browse
- In the results listing, click on the orange RSS feed box to the left of the journal you want to set-up alerts for in the future…
- Copy the RSS feed URL that appears
- Open an RSS feed reader of your choice (steps may vary based on reader)
- If using Feedly Reader, create an account/log-in with your Google account
- Once in your Feedly Reader account, click on Add Content
- Paste in the RSS feed URL in the box
- Click on Add Content
- RSS feed will appear below the content box
- Click on the RSS feed below the content box to view the most recent articles published in your journal of choice
